Summary

Enthusiastic Java developer with expertise in Spring Boot, REST APIs, and databases. Experienced in full-stack development and building scalable, reliable web applications. Passionate about writing clean and maintainable code.

Education

Universal College

Bachelor of Computer Applications (BCA)

Maitidevi, Kathmandu

Dec. 2020 – Dec 2025

Vidya Mandir Secondary School

Higher Secondary Education (+2), Science

Baglung

Jan. 2018 – Mar 2020

Experience

Java Developer Intern

AlphaTeds

Oct 2024 – Jan 2025

Matidevi, Kathmandu

- Developed and enhanced Spring Boot-based backend services, supporting core application features.
- Implemented RESTful APIs and improved request/response handling, reducing backend errors through structured validation and logging.
- Gained hands-on experience with code reviews, version control (Git), and collaborative development workflows.

DevOps Intern

KtmBees

July 2025 – Aug 2025

Un Park, Lalitpur

- Containerized applications using Docker and Dockerfiles, improving deployment consistency across environments.
- Designed and configured GitHub Actions CI/CD pipelines, automating build, test, and deployment processes.
- Worked closely with developers to ensure reliable, repeatable deployments and smoother release workflows.

Blockchain Fellowship

eSatya

May 2025 – Aug 2025

Kupondole, Lalitpur

- Gained practical experience in blockchain fundamentals, smart contracts, and decentralized applications (DApps).
- Collaborated in a team to design, develop, and deploy a blockchain-based project using modern Web3 tools.
- Strengthened understanding of security, immutability, and decentralized system design.

Projects

E-Voting System Using Blockchain | *Express, Solidity, React, Ethereum, MongoDB*

- Designed a React-based user interface, improving voter accessibility and usability.
- Implemented multi-factor voter authentication using facial recognition, OTP verification, and MetaMask.
- Stored application data securely in MongoDB while ensuring immutable vote records on Ethereum.

Expense Tracker Backend | *SpringBoot, Java, PostgreSQL, PostMan, Git*

- Designed and implemented RESTful APIs for wallet and transaction management.
- Secured endpoints using JWT-based authentication and role-based access control (RBAC).
- Used PostgreSQL with JdbcTemplate, optimizing queries for reliable and performant data access.

Job Portal System | *React (TSX), Tailwind CSS, Spring Boot, MongoDB*

- Built a scalable full-stack job portal with JWT authentication and role-based access control (RBAC).
- Designed RESTful APIs with Spring Boot and optimized MongoDB queries for efficient data retrieval.
- Developed a responsive dark-mode UI using Tailwind CSS for seamless cross-device experience.

Technical Skills

Languages: Java, JavaScript, C, Solidity, HTML, CSS, SQL

Frameworks and Libraries: Spring Boot, Spring Security, Spring Data JPA, JWT, Lombok, React.js, Node.js, Express.js, Web3.js

Developer Tools: Git, GitHub, Docker, GitHub Actions IntelliJ IDEA, Eclipse, VS Code, Postman

Databases: MySQL, PostgreSQL, MongoDB
